- Escalation of any event
- Repeat active alarms (time or priority based)
- Log messages sent to handsets
- Ability to save messages sent to handsets
- Always vibrate (override handset settings)

*Richard Schuster,
Group Manager Procurement states;*

Churches of Christ Care has more confidence in the LAS solution because the weekly reporting prevents any event, big or small, from slipping through the cracks.

We finally have a company that provides accountability software.

More on Churches of Christ Care

Care operates 26 residential aged care facilities ranging from low-care, hostel accommodation to high-care, nursing home accommodation, all with a commitment to personalised, individual care. Our 'house model' facilities are especially innovative, offering residents independent living in a supportive, group environment.
